

Shelter Accessories Series AutoVent™ Automatic Shelter Vent Kit

Keep your shelter cool and dry with AutoVent™, the ultimate ventilation system for your shelter. Vent automatically opens and closes based upon interior temperature.

Reduce humidity and moisture buildup in your fabric garage or shelter.

- A bimetallic spring, which is heat sensitive, begins to open the vent at 74°F. The vent is fully opened at 104°F. When the interior temperature cools down, the vent begins to close up.
- Easy installation with 2-sided plastic pop rivets for an airtight seal.
- Vents are screened to keep out insects and debris.
- The perfect quick and affordable ventilation air circulation solution for your fully enclosed shelter.

AutoVent™ works great with any fabric covered Instant Garage® or storage shelter.
