

WAYDE KING WATER FILTRATION

FREQUENTLY ASKED QUESTIONS

WHAT MAKES WAYDE KING'S SYSTEM BETTER THAN BOTTLED WATER?

First, it is important to know that there are no FDA regulations on "bottled water" - NONE. So, who knows the source or quality of the water you are drinking. With Wayde King's system, you and your family are ensured clean and safe drinking water where chlorine, heavy metals, volatile organic compounds, biological and chemical contaminants have all been removed.

DO WAYDE KING'S FILTRATION SYSTEMS KILL BACTERIA AND PARASITES?

Yes, they do as they contain KDF55 media, which not only removes chemicals, heavy metals and chlorine, but it also is a natural bacteriostatic, which will kill bacteria, parasites, and cysts in the water.

WILL WAYDE KING'S SYSTEM AFFECT MY WATER PRESSURE?

When installed correctly, the properly sized system will not create little to no loss in water pressure.

ARE THE WAYDE KING SYSTEMS WATER SOFTENERS?

Wayde King's filtration systems ARE NOT Water Softeners, they are Water Conditioners that filter the water. Soft water is water that has been run through a salt-based water softening system. It exchanges the healthy mineral ions with sodium ions. Water softeners do not remove the chemicals and contaminants in municipal drinking water and certainly are not suitable for safe drinking water for you and your loved ones.

WHAT IS "SOFT" WATER AND IS SAFE TO DRINK?

Water softeners use salt to exchange salt ions with the healthy mineral ions in your water. They remove the healthy minerals, making the water highly acidic. They also DO NOT filter your water which means all those dangerous contaminants will remain in your water supply. **Wayde King Water Filtration Systems ARE NOT water softeners.**

WILL YOUR WHOLE HOME SYSTEMS PREVENT HARD WATER SCALE?

YES, our systems will prevent hard water scale-up build. They are a great solution to protect your plumbing and fixtures from damaging hard water deposits

WHAT IS "HARD" WATER AND IS IT SAFE TO DRINK AND BATHE IN?

Hard water is water that contains calcium and magnesium. These are safe healthy minerals our bodies need to maintain proper health. Hard water is not only safe to drink, it is very healthy due to the beneficial minerals.

WILL I NEED AN UNDER-SINK REVERSE OSMOSIS SYSTEM FOR DRINKING WATER?

Absolutely not. The Wayde King Municipal Water Treatment systems provide naturally filtered water that will remove chlorine, heavy metals, volatile organic compounds, herbicides, pesticides, pharmaceuticals and more found in municipal drinking water across the country. They will leave in the healthy beneficial minerals providing nothing but the best spring quality drinking available.

DOES WAYDE KING'S WHOLE HOME SYSTEM NEED ANY SERVICE OR MAINTENANCE?

No, Wayde King's Whole Home Water Filtration and Conditioning Systems are completely self-maintaining and maintenance free. Unlike other systems on the market, our systems will require no maintenance of any kind. We also back that by having the best, Bumper to Bumper warranty on the market.
