GUH95C

GAS FURNACES

**THE FURNACE THAT HAS EVERYTHING
YOU NEED, RIGHT WHEN YOU NEED IT.**

**CENTURY® DELIVERS
WITHOUT DELAY.**

When you're in the market for a new furnace, you don't want to wait. But you do want to make the right decision. Trust Century® to come through every time, with furnaces that are designed well, tested for reliability and ready to go to work.

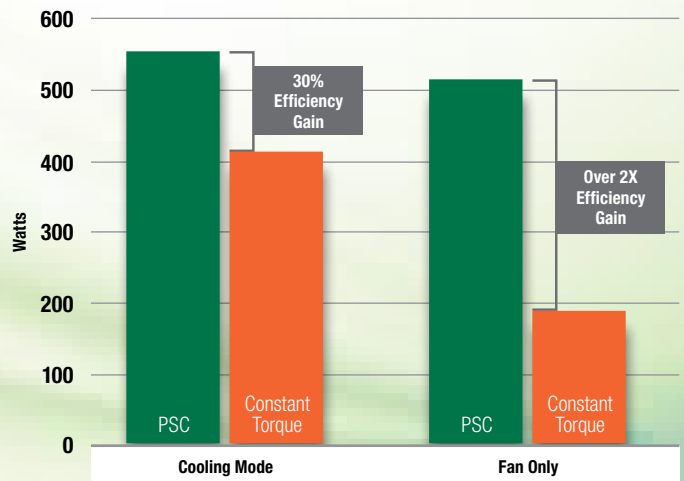

SOME DECISIONS ARE TOUGH. THIS ONE ISN'T.

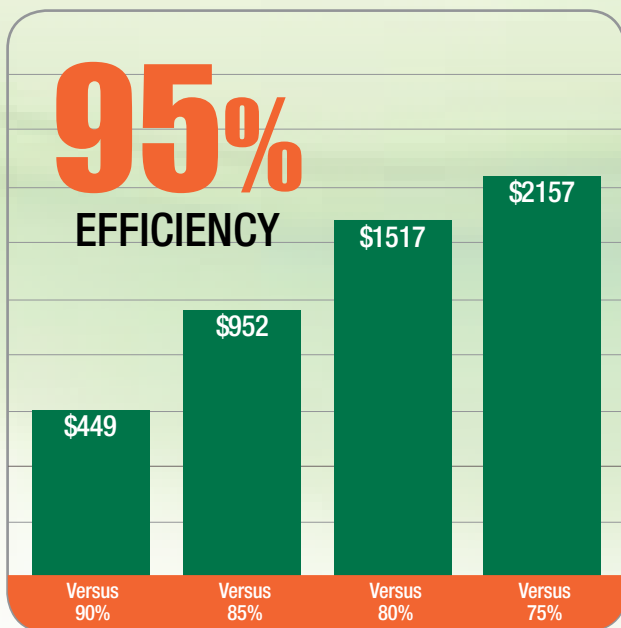

When you consider Century® systems, quality and value are givens. You're getting peace of mind with great features and smart designs that squeeze more efficiency out of every energy dollar. And best of all, you get it right now.

The highly effective high-efficiency blower.

The high-efficiency constant torque blower motor found inside the Century® GUH95C does a lot with a little. Not only does it produce more consistent airflow and more even temperatures throughout your home, it also uses up to a third less energy than a conventional blower motor.

Over the years, a hardworking Century® furnace can save you hundreds of dollars on utility bills.

Savings vary depending on use, geography, lifestyle, maintenance, installation and other factors. Chart depicts 5-year savings over less-efficient models.

An immediate solution that's also an efficient solution.

Every Century® furnace is designed to deliver reliable performance and consistently efficient energy use. As one of the standout performers in the Century® lineup, the GUH95C boasts an efficiency of 95% AFUE, meaning a full 95% of fuel is converted into usable heat. So you can spend less on energy all winter long.

THE CENTURY® GUH95C IS A SMART CHOICE NO MATTER HOW YOU LOOK AT IT.

- 95% AFUE¹ means 95% of your fuel is turned into usable heat. So you'll save energy all winter long
- The highly efficient constant torque motor will provide years of reliable operation
- The tough, dependable heat exchanger is made from aluminized steel for long life, and crimped instead of welded for durability and safety
- An anti-vibration blower assembly reduces sound levels on startup and shutdown
- Every GUH95C is factory run-tested to help deliver the highest possible level of reliability
- **Outstanding Warranty Coverage²** - The primary and secondary heat exchangers are covered by a lifetime warranty; other components are covered for twelve years, with registration within 60 days of purchase. Limitations apply, see printed warranty for details.

¹ Like the miles-per-gallon rating on your automobile, the higher the AFUE rating, the lower your fuel costs. All furnaces manufactured today must meet minimum AFUE requirements. If your furnace is 10–15 years old, it probably falls below the current minimum and wastes energy.

² Applies to residential applications only. For terms, conditions and exclusions, see full warranty at www.marsdelivers.com.

MAKE THE CENTURY® DECISION FOR IMMEDIATE RELIEF AND LONG-LASTING COMFORT.

When you think about everything Century® delivers, your decision is no decision at all. Century® offers the consistency and efficiency you're looking for. The performance and reliability you want are right here, and ready to go to work. **Century®. It's the right choice. Right now.**

Not approved for use in mobile home applications.

Due to ongoing product improvements, specifications and dimensions are subject to change and correction without notice or incurring obligations. Determining the application and suitability for use of any product is the responsibility of the installer. Additionally, the installer is responsible for verifying dimensional data on the actual product prior to beginning any installation preparations.

Third party incentive and rebate programs have precise requirements as to product performance and certification. All products meet applicable regulations in effect on date of manufacture; however, certifications are not necessarily granted for the life of a product. Therefore, it is the responsibility of the applicant to determine whether a specific model qualifies for these incentive/rebate programs.
