

Installation instructions for Ridgid® & Craftsman® Wet/Dry Vacs

Remove old filter and clean sealing surface on lid. Carefully slide opening of filter over cage. Push bottom of filter firmly down until it seats on filter post. Secure filter in place with existing filter nut. Do not over tighten. Damage or cracking of end cap due to over tightening is not covered by the product warranty. Do not use filter place supplied with vac.

NOTICE

Important: For liquid pick-up, do not fill above inlet or spillage will occur.

Warning: DO NOT vacuum oily or hazardous materials such as asbestos, lead, pesticides or other health endangering materials. DO NOT vacuum burning objects, embers or warm fireplace debris.

Warning: Remove plug from outlet before removing the tank cover.
