

### **Leather:**

Although leather is one of the most durable upholstered materials, proper care is vital to maintain its appearance and performance. Dust weekly using a soft, clean cloth slightly dampened with distilled water. Blot spills immediately with a soft, clean absorbent dry cloth.

### **Upholstery:**

To prevent overall soiling, frequent vacuuming or light brushing is recommended. Cushions and pillows should be turned on a weekly basis. Down-filled cushions should be brushed rather than vacuumed. Spot clean, using a mild water-free solvent or dry cleaning product. Only a professional cleaner should undertake a complete overall cleaning. The use of steam or water-based cleaners may cause excessive shrinking or staining.

### **Woven/Rattan:**

Dust regularly with small brush or vacuum. Spills should be taken care of immediately with a slightly dampened sponge before they harden or stain.
